

Tubular Level Indicator

Model No-LTLI-2200L

PRODUCT DESCRIPTION:

The Tubular Level Indicator is a simple, reliable and cost-effective device for direct visual indication of liquid level in storage and process tanks. It provides clear and continuous level indication through a transparent tubular glass or suitable transparent tube. It is suitable for atmospheric as well as pressurized tanks and can be supplied with suitable process connections, isolation valves and protective arrangements as required by the application. The robust construction ensures easy installation, simple operation and low maintenance, making it suitable for a wide range of industrial liquid-level measurement applications

CONSTRUCTION & DESIGN FEATURES:

- The indicator is fitted between two end blocks using suitable gland packings and is mounted parallel to the tank, forming a closed-loop arrangement that allows the liquid level in the indicator to correspond directly with the tank level.
- Protective guards are provided in the form of tie-rods for 360° visibility or C-channel guards around the gauge to protect the indicator from accidental impact.
- The indicator tube can be removed and replaced without dismantling the complete gauge, ensuring easy maintenance.
- 100% PTFE bushes/packing are provided to ensure reliable leak-tight performance under full vacuum as well as service pressures up to 6 kg/cm².
- Available in a single length up to 2000 mm C/C distance. For greater measuring lengths, two or more sections can be coupled using suitable couplers.
- An air vent plug is provided at the top and a drain plug at the bottom for venting, draining and liquid sampling.
- Inbuilt isolation valves or offset-type isolation valves can be provided as an option, depending on the application requirements.
- Process connections are available in Flanged, Screwed or Tri-Clamp (TC) joint configurations.

APPLICATIONS:

The Tubular Level Indicator is suitable for direct visual level indication in Water & Wastewater Treatment Plants, Effluent Treatment Plants (ETP), Sewage & Liquid Storage Tanks, Chemical Dosing Systems, Chemical Reactors, Fertilizer Industries, Power Generation Plants, Automobile Industries, Pharmaceutical Industries, and various other process and utility applications.

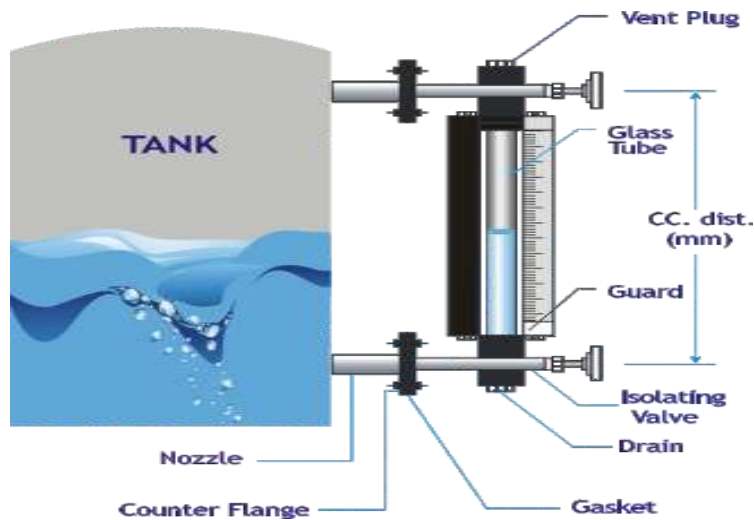

Tubular Level Indicator

Model No-LTLI-2200L

ORDERING INFORMATION:

Sr. No.	Parameter	Available Options
1	Glass Tube	19 mm OD × 9 mm ID / 25 mm OD × 5 mm ID
2	Protection Guard	MS 'C' Channel / SS 304 'C' Channel / MS Tie Rods / SS 304 Tie Rods
3	End Fittings	SS 304 / SS 316 / Carbon Steel / PP / Other Material
4	Isolation Valve	Not Provided / Needle Valve
5	Drain	Drain Plug / Ball Valve
6	Process Connection	Flanged / Screwed
7	Scale	Aluminium / SS 304 / Polycarbonate

Schematic Diagram:

ORDERING INFORMATION:

Parameter	Options / Specification	Code
Model	Tubular Level Indicator	LTLI
Glass Tube	19 mm OD × 9 mm ID	9
	25 mm OD × 5 mm ID	5
C/C Distance	Specify in mm	XXXX
Protection Guard	MS 'C' Channel	MC
	SS 304 'C' Channel	SC
	MS Tie Rods	MT
	SS 304 Tie Rods	ST

	Other	OM
End Fittings	SS 304	4
	SS 316	6
	Carbon Steel	C
	PP	P
	Other Material	O
Isolation Valve	Without Isolation Valve	W
	Needle Valve	N
Drain	Drain Plug	P
	Ball Valve	B
Process Connection	Flanged	F
	Screwed	S
	Tri-Clamp	TC
Scale	Aluminium	A
	SS 304	S
	Polycarbonate	P
Vent	Air Vent Plug	V
Insulation	Without Insulation	W
	Insulated / Heat Insulation	I

ORDERING FORMAT

LTLI – Glass Tube – Protection Guard – End Fittings – Isolation Valve – Drain – Process Connection –
Scale – C/C Distance

ORDER EXAMPLE

LTLI – 9 – MC – C – W – P – F – A – 2000

Description: Tubular Level Indicator with 19 mm glass tube, MS ‘C’ channel protection guard, carbon steel end fittings, without isolation valve, drain plug, flanged process connection, aluminium scale and 2000 mm C/C distance.
